第3回 奈良女子大学 文学部 欧米言語文化学 講演会（言語学3）

言語学（語用論）の領域でご活躍の Professor Eun-Ju Noh をお迎えし、「メタ言語否定」と呼ばれる
言語現象についてお話していただきます（下記、講演概要をご参照ください）。

Processing metalinguistic negation: a default model vs. a context-dependent model
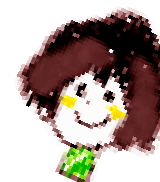

Professor Eun-Ju Noh (Inha University, Korea)

公開講演
使用言語：英語

平成 26 年 2 月 10 日（月）　14:00〜16:30
奈良女子大学総合研究棟文学系 S 棟 2 階 S227

14:00-15:00	講演
15:00-15:30	質疑応答
15:30-16:30	茶話会

Abstract: The presentation deals with the interpretative process of metalinguistic negation (MN), as opposed to descriptive negation (DN). There are two accounts of the interpretation process of MN: one is that negation is interpreted as descriptive by default and that an MN interpretation is taken only after the DN interpretation turns out to be a semantic contradiction to the clarification clause (a semantic account). Another is that the type of negation is chosen by considering optimal relevance. People take an interpretation that yields greater cognitive effects with less processing effort (a cognitive account). The presentation introduces eye-tracking experiments conducted on MN-DN pairs in Korean. The processing times at the clarification clauses were not significantly different between MNs and DNs, which provides no evidence of the semantic account. It is rather consistent with the cognitive account.
